Commonly asked questions

## Introduction

This document contains a list of all the questions that one might get before or during this workshop.

If your question is not listed here, please connect with me to resolve the same.

# Frequently asked questions

## **Q. Is the workshop focusing on load testing?**

No, load testing is a sub practice of performance testing. We will dive into general and modern performance testing practices and discourage the audience to focus so much on just load testing.

## **Q. I'm new to performance testing. Will it impact this workshop?**

No, we will provide somewhat universal topics. It will be especially useful if you come fresh as the workshop focuses on modern techniques that people experienced in the traditional practices may have difficulties accepting.

## **Q. Will we create a framework during this workshop?**

Somewhat, the process that will be described will help teams to rethink how to create some best practices and framework of processes.

## **Q. I do not have any prior automation experience with any tool stack. Can I still attend this workshop?**

Yes, you can attend this workshop and understand the performance assurance practices.

The examples will be as straightforward as possible.

## **Q. Will the workshop cover specifics of grafana, influxDB or Jenkins?**

No, the focus of the workshop is to help to understand how to modernize performance testing practices. We will just do quick reviews on the tools, but any task can be done on any dashboarding platform, time based database or CI/CD platform.

## **Q. Will we run commands from the CI tool?**

Yes. Multiple tools and elements in the workshop will focus on streamlining commands in the CI for pipeline integration.

**Q. Will we get enough time to do the hands-on implementation?**

The examples will be created live and from scratch in the workshop. Even searching for the “how to do” pages.

The attendees may have enough time to follow the steps and concepts themselves.

**Q. Can participants ask questions during the workshop?**

I will be focused on moving on with the steps but occasionally checking the chat and asking for quick questions to make sure everyone is up to speed. Sadly won't be able to stop much.

**Q. I have a query related to k6**

Please reach out to the k6 community forum

<https://community.k6.io/>

**Q. I have a query related to Grafana**

Please reach out to the k6 community forum

<https://community.grafana.com/>

**Q. I need further assistance/help after the workshop**

Please feel free to DM me, comment, follow, or subscribe on any of my socials
